WORK EXPERIENCE

Applications Developer - 6 Month Contract

December 2019-Current

Catholic Diocese of Columbus, OH

- Replaced old user heavy, complex, manual processes with streamlined web apps using asp.net core, blazor and sql server.
- Finished two applications solo from start to finish for the finance department. Held monthly meetings with the CFO to go over progress, test the app and brainstorm ways to improve the process.
- When needed I would work on enhancements for existing applications in production.
- Volunteered for duties outside of my scope during COVID lockdown to alleviate some of the onsite responsibilities of more vulnerable co-workers.

Software Engineer - 90 Day Contract

September 2019-December 2019

Chepri LLC, Columbus, OH

- Helped create and maintain online-ordering functionality for several restaurant chains including Freebirds, Salata, and Saladworks. Written in Angular and Ionic
- Worked on apps for in-store kiosks, kitchen display systems, and point of sale, linking them all together with GraphQL and AWS
- Received support tickets directly from clients, while in communication with the client wrote the bug fixes, or enhancements, pushed changes to a staging environment for testing and ultimately pushed to the production site.
- Every week all 15 employees anonymously vote on a star employee of the week, I was voted as star employee of the week twice after being there for only 6 weeks.

Software Engineer

August 2018-September 2019

Aprimo, Indianapolis, IN

- Develop internal applications used by DevOps, Customer Service and Site Reliability Engineers. Written in Angular and C#
- Took lead on projects given to the junior devs and presented the finished product to the rest of the dev team and leadership team.
- Created CI CD pipeline from scratch for two production applications. Build pipeline using YAML, Infrastructure release with ARM template, Code release through Azure DevOps
- Spent time afterhours becoming proficient on technologies not learned from school

Libbykayauthor.com**June 2019-Current**

Freelance webpage

- Created, maintain and update a webpage for a local romance author
- Written using HTML, CSS, Angular and Bootstrap
- CI CD build and release pipelines created in Azure DevOps, deployed to an azure storage account
- Uses CDN with rules in place such as reroute from HTTP to HTTPS and root to www
